

R-2000*i*A™ Series

Basic Description

The R-2000*i*A series is FANUC Robotics' latest-generation, six-axis, heavy-payload, high-performance family of industrial robots, supported by our extensive service and parts network. The R-2000*i*A provides higher value through improved performance, reliability and maintainability. It features the SYSTEM R-J3*i*B intelligent robot control system.

R-2000*i*A, the Solution for:

- Automotive spot welding and general assembly
- General industrial applications
- Part transfer
- Material removal
- Dispensing
- Machine loading
- Arc welding

Benefits

- Slim arm and wrist assemblies minimize interference with system peripherals and allow operation in confined spaces.
- Large allowable wrist moments and inertias meet a variety of heavy handling challenges.
- Many process attachment points make integration easier.
- Stationary outer arm simplifies hose and cable dressout, prolonging service life.
- Proven, reliable FANUC servo drives provide highest uptime and productivity.
- Longer maintenance intervals equate to lower operating costs.
- Fewer mechanical components reduce down time, increase mean time between failure (MTBF) and minimize spare part requirements.
- High-performance motion yields fast cycle times and high throughput.
- Wrist flange and base mounting are identical to the S-430*i*, allowing for seamless backward compatibility.

- R-2000*i*A/165F can reach all areas of S-430*i*W/165 work envelope, making replacement easy.

Features

Mechanical:

- Large work envelope with ability to reach overhead and behind
- 6 axes of motion
- Slim profile design
- RV reducers for all axes
- Elimination of counterweight increases available workspace
- Process/application cables routed through the arm
- No motors at wrist

Control:

- B-size cabinet
- Quick change amplifier <5 min.
- Fast boot time <30 sec.
- Standard Ethernet port
- PCMCIA Software distribution
- Easy connections to a variety of I/O, including a number of distributed I/O networks
- *i*Pendant, a color, Internet-ready teach pendant for even easier programming and custom cell user interface design

Software:

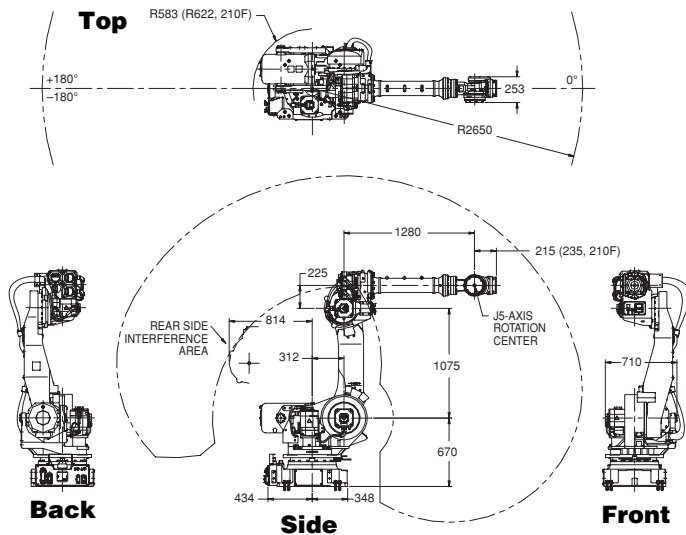

- Process specific software packages for various applications
- Web-based software tools for remote connectivity, diagnostics and production monitoring
- Machine vision for robot guidance and inspection

Options

- Enhanced severe dust and liquid protection package with two-part epoxy paint for harsh environments.
- Standard baseplate for quick robot installation.
- Auxiliary axes packages for integration of peripheral servo-controlled devices.
- Adjustable hard stops for J1, J2 and J3.
- Various robot connection cable lengths for flexible cabinet placement and optional track rated cables.
- *i*Pendant is also available with touch screen support.
- Monochrome pendant available.
- Integrated spot welding utilities.
- Electrically insulated faceplate.
